What is Fresh Coop odour control ?

Fresh Coop Odor Control is a neutralizer that eliminates the harmful ammonia levels, controls and kills the odours in the area(s), and absorbs any moisture that might be in, around, or beside your Chicken Coop. The Fresh Coop Odor Control not only helps improve the smell of the area in and around your Chicken Coop, but it also makes the area feel tidier and under control.

What can it do ?

Fresh Coop Odor Control provides the latest innovation and technology within the livestock industry that provides one of the best odor neutralizers out in the marketplace. The product combines natural Food Chemical Codex Grade Diatomaceous Earth, along with Calcium Montmorillonite and non-GMO Citric Acid. This allows the Fresh Coop Odor Control to eliminate all harmful ammonia levels, control the odor in the surrounding area, and absorbs all of the moisture that is built up in your backyard chicken coop. Thus, your chickens and your chicken coop will be a healthier and cleaner environment.

The Fresh Coop Odor Control can also be used with and around backyard chickens, pullets, layers, quail, ducks, turkeys, pigeons, and pheasants.

Application

- Remove the eggs before cleaning the coop.
- Wear a dust mask and protective eye wear while cleaning your chicken coop.
- With the use of the odour control, cleaning the coop is much easier.
- When the coop is clean, you put a layer down all over your floor to keep your moisture down and the odour down.
- Avoid sprinkling the product in the nesting boxes.
- Sprinkle your fresh bedding right on top of the odour control and your chickens are ready to come back in the coop.
